

SEBASTIAN JULON CHAMANA

Lima, Peru | [+51 994244459](tel:+51994244459) | antidote149@hotmail.com | [Portfolio Web](#) | [LinkedIn](#)

Professional Profile

Committed to building innovative technology, with over 3 years and 6 months of professional experience in the analysis, design, development, testing, deployment and maintenance of APIs, web applications, integrations, ERP B2B/B2C systems, cloud services and process automation — always focused on digital transformation and client satisfaction.

Experience

AI Developer

Sept.2025 – Present

UTP (Universidad Tecnológica del Perú)

Stack: Python, FastAPI, LangChain, LangGraph · **AWS:** Bedrock (Knowledge Bases, Nova Pro, Guardrails), Lambda, API Gateway, SQS, DynamoDB, S3, Aurora Serverless v2 · **Azure:** Functions, Service Bus, Blob Storage, Graph API · **LLMs:** Claude, Gemini, GPT.

- Developed an AI chatbot for Student Support with a serverless RAG pipeline on AWS (Lambda, API Gateway, SQS, DynamoDB, S3, Bedrock Knowledge Bases + Aurora Serverless pgvector), generation via Bedrock Nova Pro and Guardrails for content filtering and PII detection.
- Built a multi-agent system for university pedagogical content generation with LangChain and Python using different LLM models (GPT-4.1-mini + Gemini 2.5 Flash), automating the creation of course schemas and IPES.
- Developed a Microsoft Teams agent on Azure Functions, integrated with Graph API to automatically process meeting transcriptions, generate insights with LLMs and publish them on Monday.com via Azure Service Bus.
- Delivered presentations and demos of AI solutions to UTP stakeholders and management, translating technical value into business terms and supporting decision-making.
- Participated in the PoC and MVP lifecycle: development, presentations and demos to end users, feedback-driven iteration, and evolution to production-ready pilots.
- Evaluated and compared LLM models (Claude, GPT, Gemini) across multiple PoCs, selecting based on cost, quality and latency per use case.

FullStack Developer May.2025 – Jul.2025 Periferia IT Group SAC

Client: UTP

Stack: React, Node.js, NestJS, AWS (Lambda), DynamoDB, PostgreSQL, Azure DevOps and SonarQube

Backend

- Development and implementation of full stack solutions for a university enrollment system.
- Implementation of REST APIs using Node.js and NestJS.
- Cloud service integration using AWS, including Lambda functions with DynamoDB and PostgreSQL.

Frontend

- Development of modern interfaces with React, TypeScript and Vite.
- Implementation of unit tests with Jest, complying with quality standards defined by SonarQube in Azure DevOps.

FullStack Developer

Mar.2025 – May.2025

IDS Latam S.A.C

Stack: React, TypeScript, .NET 8, Clean Architecture, Multi-module, MicroFrontend with webpack, Github, SQL Server, Relational databases.

Client: IXM Metals

Backend

- Developed backend services in .NET 8 within a microservices environment, applying clean architecture.
- Integrated and consumed REST APIs with a focus on performance and security.

Frontend

- Analyzed and translated functional requirements into efficient technical solutions.
- Designed, developed and maintained user interfaces with React and TypeScript, ensuring the best user experience.
- Participated in the migration of JavaScript-based applications to modern architectures with React.
- Collaborated in the adoption of Micro-Frontends, promoting modularity and component independence.

FullStack Developer

May.2023 – Mar.2025

Radar365

Client: PG Procter

Stack: React, AWS, ApiGateway, DynamoDB, S3, Cognito, Lambdas, TypeScript, NodeJS.

Backend

- Implemented and maintained serverless APIs in Node.js using AWS Lambda and API Gateway to integrate mobile applications, web platforms and other cloud services, handling over **200 daily requests**.
- Used DynamoDB to reduce costs and improve adaptability to AWS services, easily connecting Websockets where required.
- Deployed AWS services using SAM and CloudFormation to accelerate service creation across dev, QA and prod environments.
- Developed enterprise **B2B solutions** for the secure governance and distribution of data between companies and over **50 supplier users**.

Frontend

- Migrated desktop applications to the web using React, TypeScript and JavaScript, deploying with AWS Amplify and SAM.
- Used Figma designs provided by UX specialists to build the user interface.

Projects & Achievements

- **YALO-HablaPEPE:** Developed an algorithm for the promotions logic, optimizing its workflow and ensuring efficiency in promotions management. Created a robust API in Node.js with DynamoDB, designed to handle concurrent and recurring traffic, ensuring over **200 daily queries** without interruptions.
- **Analytics Project:** Designed and developed a B2B web platform used by over **50 active users**, offering: bulk data export optimized for large volumes; advanced filtering and segmentation features; detailed role and permission management to ensure security and accessibility.

Tech Knowledge

Programming Languages: Javascript, Python, TypeScript, Java, and C#.

Frameworks & Libraries: NodeJS, React, NestJS, Next.js, Spring, React Native, Expo, .NET, FastAPI, Electron, LangChain, LangGraph.

Databases: SQL Server, MongoDB, PostgreSQL, Redis, Clickhouse, DynamoDB.

Data Analysis Tools: SQL Server Analysis Services, Integration Services SQL Server, Grafana, MicroStrategy.

Web Analytics: Google Data Studio, Power BI.

Operating Systems: Linux (Ubuntu 24), Windows Server 2016.

Cloud Services: Amazon AWS (Bedrock, Lambda, API Gateway, SQS, DynamoDB, S3, Aurora Serverless), GCP (Google Cloud), Azure.

Optimization & Testing: Jest, Black-box testing, A/B Testing, JMeter, Selenium.

Version Control: Github, Azure DevOps, Gitlab.

Methodology: Agile, Scrum.

Academic Education

Bachelor's Degree in Information Systems Engineering

Universidad Peruana de Ciencias Aplicadas

Aug.2015 – Dec.2023

Languages

- Spanish (Native)
- English (B2) – IELTS Score 6.5

Complementary Education

- IBM Cybersecurity Analyst Professional Certificate – 2022
- IELTS Academic Exam – 2022
- SCRUM STUDY Scrum Fundamentals Certified (SFC) – 2022
- IBM Cloud Application Development Foundations (Cloud Computing, HTML/CSS/JavaScript, Cloud Native Applications, NodeJS & React) – 2023
- UI/UX Design – CalArts / Coursera – 2023
- Microsoft Certified: Azure Fundamentals AZ-900 – 2025

Academic Research

Predictive Analysis System based on Machine Learning to reduce voluntary resignations in Lima, Peru (bachelor's thesis): Developed a system in Python using numpy, pandas and SQLite that analyzes and predicts voluntary employee resignations using machine learning models, improving result predictability and precision.
